

Зад. $x_1, x_2, \dots \sim \text{Ber}(p)$
 кз.

$$P(\{X_1 + \dots + X_{k+r} = r\} \cap \{X_1 + \dots + X_{k+r-1} = r-1\}) = ?$$

Зад. $\boxed{\square \square \dots \square \square}$ $m-1 \quad m$ погвожница

~~Решение: Да, 1 P~~

$P(\text{ученик}) = p$
 успех и провал

Всички ученици —> първоначално е в списък с успех

$P(\text{га ученик} \geq 2 \text{ успеха})$

Решение

Да: $1 - \underbrace{P(\text{га ученик} 0)}_{p_0} - \underbrace{P(\dots 1)}_{p_1}$

$$p_0 = (1-p)^n$$

$$p_1 = m \cdot \sum_{k=1}^m \underbrace{\binom{n}{k} p^k (1-p)^{n-k}}_{\text{Всички ученици са в списък с успех}} \cdot \underbrace{\left(\frac{1}{m}\right)^k}_{\text{Всички ученици са във фикс. списък}} =$$

$$= m \left(\sum_{k=0}^n \binom{n}{k} \left(\frac{p}{m}\right)^k (1-p)^{n-k} - (1-p)^n \right) = m \left(\left(\frac{p}{m} + 1-p\right)^n - (1-p)^n \right)$$

Зад. $H_0: p_0 = 1/2$
 $H_1: p_0 = 2/3$

$$P(H_0) = P(H_1) = 1/2$$

$A = \text{от 200 ученика има 120 успеха}$

$$P(H_0|A) \leq P(H_1|A)$$

Решение: $p_0 = 1/2 \approx 100 \text{ успеха}$

$p_0 = 2/3 \approx 100 \cdot 2/3 \approx 133 \text{ успеха}$

$$P(H_0|A) = \frac{P(H_0 \cap A)}{P(A)} = \frac{P(A|H_0) \cdot P(H_0)}{P(A)}$$

$$P(H_1|A) = \frac{P(A|H_1) \cdot P(H_1)}{P(A)}$$

$$P(A|H_0) = P(\text{Ber}(200; 1/2) = 120) = \binom{200}{120} \left(\frac{1}{2}\right)^{120} \left(\frac{1}{2}\right)^{80}$$

$$P(A|H_1) = \binom{200}{120} \cdot \left(\frac{2}{3}\right)^{120} \cdot \left(\frac{1}{3}\right)^{80}$$
